Wi-Fi REPEATER

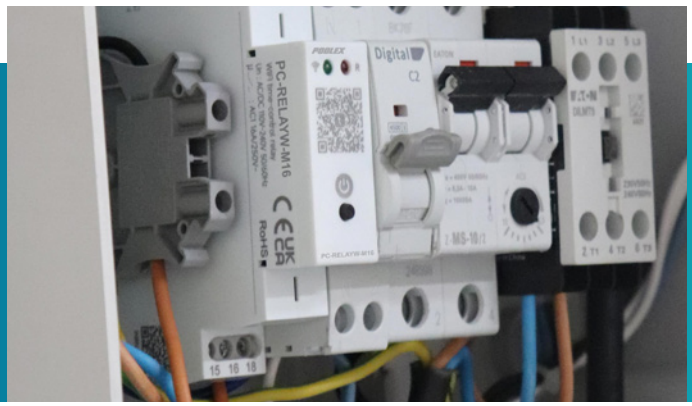

Your pool goes connected!

Discover the Poolex Wi-Fi Relay: flexible connectivity for all your ON/OFF equipment (lighting, filtration pump, waterfall, booster pump for robot, etc.).

- **Universal Wi-Fi Control :** Remotely control any ON/OFF equipment (up to 16A) via smartphone.
- **Scheduling :** Replaces the mechanical timer with IoT operating schedules, adjustable to the minute.
- **Scenarios & Automation :** Create customized time slots (off-peak hours, automatic nighttime lighting).
- **Universal DIN Rail Format (1 module) :** Ultra-compact, compatible with all standard electrical panels.
- **Integrated Installation :** Direct connection to the control system of existing equipment without adding an extra electrical box.
- **Wi-Fi Connectivity :** 2.4 GHz Wi-Fi protocol optimized for universal communication. If needed: Wi-Fi Link (SKU: PC-POOLWLNK-4G).
- **Multi-Equipment Management :** Use multiple relays to separately automate filtration, lighting, and more.
- **Poolex Ecosystem :** Full integration into the Poolex mobile app to simultaneously manage your heat pump, water treatment system, and relays.

The Poolex Wi-Fi Relay replaces your mechanical pin timers with high-precision digital control.

This universal Wi-Fi relay installs on the DIN rail of your electrical panel to remotely control any ON/OFF device: filtration, lighting, or pool cover…

WARRANTY

Wi-Fi Relay **2 YEARS**

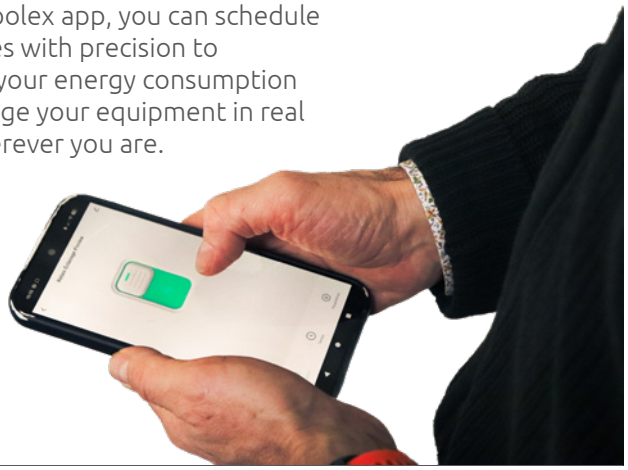

www.poolex.fr

Modernize your existing installation and centralize the control of your pool on a single interface: the Poolex app.

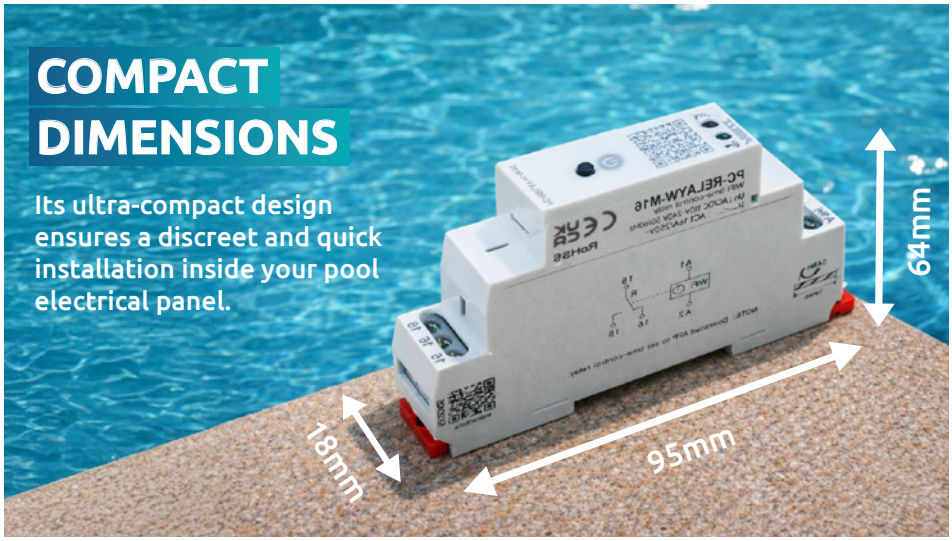

Wi-Fi Control

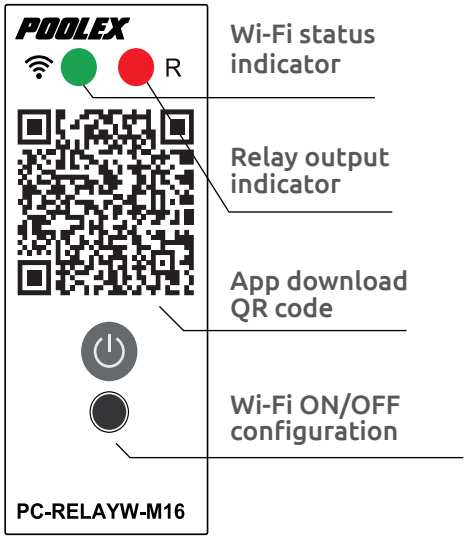

Via the Poolex app, you can schedule your cycles with precision to optimize your energy consumption and manage your equipment in real time, wherever you are.

COMPACT DIMENSIONS

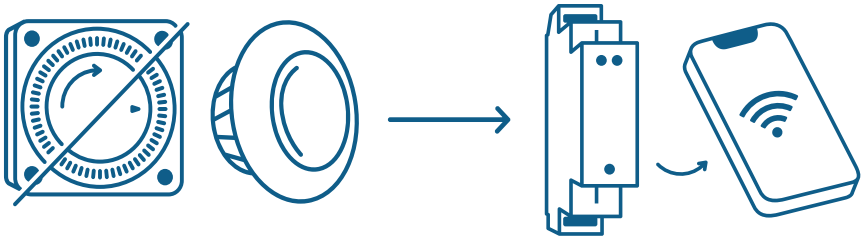

Its ultra-compact design ensures a discreet and quick installation inside your pool electrical panel.

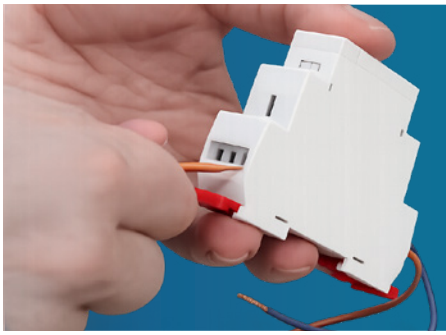

STEP INTO THE 2.0 ERA

By acting directly on the control circuit, it brings digital flexibility to your existing components.

TOTAL CONTROL & SAVINGS

This is the simplest upgrade to radically transform the management of your pool. You no longer have to deal with how your pool operates you control it with precision. By adjusting your filtration cycles and accessories in real time, you optimize your energy consumption while ensuring perfectly clean water.
